

GBG Triomont XS WC fixture

Код виробу:
GB1921102020

Код EAN:
8711778140813

Triomont XS

Опис

The fixture is only 380 mm wide, enabling it to be fitted even in corners and smaller spaces. For corner installation, simply supplement with corner mountings. The fixture is supplied with protective covers for tiling work. No tools are required to service or replace the float or flush valve. The shut-off valve is easily accessed from the cistern. The depth of the fixture can be adjusted between 140 and 200 mm. The height of the WC bowl can be adjusted between 400 and 600 mm for a comfortable seat height.

Weight with packaging 14 kg

Інформація з заповнення

Included with delivery:

- WC fixture with wall installation kit
- Complete flush cistern insulated against condensation with flushing fitting and shut-off valve
- Connection components for drain and water (pipe-in-pipe)
- Mounting components for WC bowl
- Hole template in blue plastic for front cover
- Protective plugs
- Installation template
- Screws and plugs for fixing to floor
- Insulation protection, intermediate
- Installation instructions

Монтаж

Install according to supplied installation instructions. The fixture can also be installed in a corner, when complemented with corner mountings. To avoid making holes in the floor sealing layer, optional lower wall mounting accessories can be used. The water supply can be connected from above or from the left side of the cistern. Extra long waste pipe/flush pipe for thick walls as standard. The flush cistern is ready for pipe-in-pipe connection. Can be connected to a 110 or 90 mm size waste system. Eccentric reducer 90/110 mm supplied. The waste bend is easily attached and is easily rotated depending on whether the connection is made to the left or right of the fixture. Note that a secure wall is required between the fixture and the WC bowl to prevent damage to the outer surface of the wall.
